

12 Months of Learning

by
go1

Great news! We've made it easy for you to engage your school staff in lifelong professional learning with our 12 Months of Learning calendar!

What is it?

- A new curated playlist is released at the start of each month themed around an important topic in education.
- We'll keep you ahead of the game by telling you in advance what is coming in the next quarter so you can plan your professional learning opportunities.
- You'll receive a monthly hype email letting you know that the new month's playlist has gone live and the types of content that have been curated within it.

Easy Engagement

- Forward each month's playlist hype email that you receive to your staff.
- Start a Course Club for staff to share what they learned from a piece of learning from that month's playlist.
- Assign a short video from the playlist to groups of staff and provide an opportunity to share learning.
- Regularly give staff an opportunity to share what they learned during staff meetings/morning briefings.

What's coming up?
